

Old Babylonian Freie Sign List

Version 2.0.0

Institut für Altorientalistik
Freie Universität Berlin

Corvin R. Ziegeler

November 4, 2024

Key:

- Signs marked in yellow can only be displayed as *typographic ligatures*.¹
 - Rows marked in red contain signs without stable *codepoints*. These are added as part of the *private use area* of the font.
 - Blue rows indicate signs with *stylistic alternates*.²
- (...) If Mittermayer changed the sign name, the Ellermeier Name is added in round brackets.
- [...] If the Ellermeier name does not work with Enmerkar (𐎶𐎵𐎶𐎵𐎶𐎵)³, there is another keyword (usually a reading) in square brackets.

1. Refer to the “Quick Guide” or the more comprehensive German documentation for detailed instructions on using the marked signs.
2. These are added when the design of the *aBZL* sign was altered significantly. Using the *salt* feature, you can access the more original design.
3. Enmerkar is an input method for Windows and OSX developed by Robin Leroy. It can be found in this [GitHub repository](#).
