Key:

- Signs marked in yellow can only be displayed as typographic ligatures.
- Rows marked in red contain signs without stable *codepoints*. These are added as part of the *private use area* of the font.
- Blue rows indicate signs with *stylistic alternates*.²
- (...) If Mittermayer changed the sign name, the Ellermeier Name is added in round brackets.
- [...] If the Ellermeier name does not work with Enmerkar (寒下 🏟 🖏)³, there is another keyword (usually a reading) in square brackets.

^{1.} Refer to the "Quick Guide" or the more comprehensive German documentation for detailed instructions on using the marked signs.

^{2.} These are added when the design of the *aBZL* sign was altered significantly. Using the *salt* feature, you can access the more original design.

^{3.} Enmerkar is an input method for Windows and OSX developed by Robin Leroy. It can be found in this GitHub repository.
